Professional Summary

Software Engineer with 3+ years of experience in Python, backend development, CI/CD Integration and scalable platform engineering. Skilled in Django, Docker and distributed Testing infrastructure. Experienced in building frameworks, full stack applications and reusable developer platforms with strong problem solving and system design fundamentals.

KEY STRENGTHS

Strong Problem-Solving skills and proficiency in Data Structures and Algorithms and quick learner adapts to new tech within minimal interactions.

EDUCATION

Master of Computer Science, Department of Computer science, Pune University Campus [2020-2022]
Score: 7.0 CGPA

Bachelor of Computer Science, R.B.N. Borawake College, Shrirampur. [2017-2020]
Score: 73.0%

SKILLS

Framework	Django, Flask, ReactJS, Ant Design, Cypress, Playwright
Language:	Python, C, Javascript
Databases	SQL, MySQL, MongoDB, PostgreSQL
DevOps & Tools:	GitLab CI/CD, Docker, Kubernetes, Nginx, Git
Others	HTML, CSS, Elasticsearch, AWS, DRF, Redis, REST APIs

EXPERIENCE

Member of Technical Staff July 2022 - Present
Coriolis Technologies Pvt Ltd. Pune

- **GitLab Pipelines:** Built and optimised GitLab CI/CD pipelines with automated linting and validation using PyLint, ESLint, Prettier, improving code quality and deployment efficiency .
- **UI Framework:** Designed a scalable UI automation infrastructure using Cypress and Dockerized environments, reducing manual testing by 70%.
- **REST API Framework:** Developed a high-performance REST API automation framework in Python, Improving regression execution speed by 50%
- **Framework Parallelisation & DevOps:** Implemented parallel execution architecture using Docker & Kubernetes, reducing CI runtime by up to 7 hours.
- **Full-Stack Product Development:** Led development of internal HR and performance management dashboards using Django, React, and Ant Design with deployment on Nginx.
- **Team Leadership & Agile Collaboration:** Collaborated across agile teams, mentored junior engineers, and contributed to timely high quality product releases.

PROJECTS

Real-Time Feature Flag Platform: Built and packaged a feature flag service in Django, DRF, and Postgres that lets team turn feature on or off and roll out them out gradually without redeploying. Support flag CRUD plus percentage based rollouts where the same user consistently sees the same version of feature. Shipped as a reusable python package with demo client that picks up flag changes within seconds.

ACHIEVEMENTS

- Certificate of Recognition and Extra Miler Award [Thales, Noida] [12/2024-Present]
- AWS Solution Architect Associate
