PROFESSIONAL SUMMARY

Backend Engineer with 4 years of experience building Python and Django REST APIs and full-stack internal platforms. Delivered a production HR and performance management dashboard, designed a real-time monitoring backend using Django and WebSockets, and built containerized CI/CD pipelines with Docker, Kubernetes, Nginx and GitLab that cut pipeline runtime by 7 hours. Strong in REST API design, PostgreSQL, Redis, and deployments on AWS.

EXPERIENCE

Member of Technical Staff – Software Engineer, Backend *July 2022 – Present*

Coriolis Technologies Pvt. Ltd. Pune, India

- Led end-to-end development of an internal HR and performance management dashboard using Django, ReactJS, and Ant Design.
- Designed backend REST APIs and data models, and handled production deployment on Nginx with GitLab CI/CD integration.
- Engineered multi-stage GitLab CI/CD pipelines with automated linting (PyLint, ESLint, Prettier), enforcing consistent code quality.
- Implemented parallel execution architecture using Docker and Kubernetes, reducing CI pipeline runtime by 7 hours.
- Designed and shipped a Python-based REST API automation framework with modular, reusable components and environment variable-driven configuration for seamless CI/CD compatibility, improving regression execution speed by 50%.
- Mentored junior engineers and contributed to agile sprint planning and cross-functional product delivery.

PROJECTS

ASRM Dashboard | Python, Django, WebSockets, PostgreSQL, GitLab CI/CD

- Designed backend services for real-time monitoring and analytics using Django and WebSockets.
- Implemented secure APIs and optimized database queries for high-frequency data ingestion.
- Integrated CI/CD pipelines for automated testing and streamlined deployments.

Pixelreaper Framework | Claude Code Agents, Playwright MCP, GitLab *Dec 2024 – Present*

- Built an AI-augmented developer tooling platform using Claude Code agents and Playwright MCP to reduce manual engineering effort.
- Engineered custom agent skills, multi-language code generation pipelines, and automated GitLab merge request review workflows.

TECHNICAL SKILLS

Backend: Python, JavaScript, Django, DRF, Flask, FastAPI, REST APIs

Databases: PostgreSQL, MySQL, Redis

Containerization and Orchestration: Docker, Kubernetes

CI/CD and Deployment: GitLab CI/CD, Nginx, Git

Cloud: AWS (EC2, S3)

Testing: Pytest, Playwright, Allure, Postman, Unit Testing, API and UI Testing

AI / GenAI: LLMs, Claude Code Agents, MCP, RAG, Prompt Engineering

EDUCATION

Master of Computer Science *Aug 2020 – June 2022*

Savitribai Phule Pune University, Campus (PUCSD), Pune
