Summary

Backend Software Engineer with 4 years of experience building Python web services, REST APIs, and full stack internal platforms. Proficient in Django, DRF, PostgreSQL, Redis, and Docker. Delivered production dashboards, API frameworks, and containerized CI/CD pipelines at scale. Experienced with Kubernetes based deployments, Nginx hosting, and AWS cloud environments. Currently focused on building AI-powered developer tools.

Experience

Member of Technical Staff - Software Engineer Backend Coriolis Technologies Pvt. Ltd.	July 2022 – Present Pune
– Led end-to-end development of internal HR and performance management dashboard using Django, ReactJS, and Ant Design. – Designed backend REST APIs, data models and handled production deployment on Nginx with GitLab CI/CD integration. – Designed and shipped a Python based REST API automation framework, improving regression execution speed by 50%. – Built modular, reusable framework components with environment variable-driven configuration for seamless CI/CD compatibility. – Engineered multi-stage GitLab CI/CD pipelines with automated linting (PyLint, ESLint, Prettier), enforcing consistent code quality. – Implemented parallel execution architecture using Docker and Kubernetes, reducing CI pipeline runtime by 7 hours – Mentored junior engineers and contributed to agile sprint planning and cross functional product delivery.	

Projects

- Feature Flag Platform Django. DRF. PostgreSQL. Redis June 2025 – Present
 - Built a production ready feature flag service supporting flag CRUD and percentage based gradual rollouts without redeployment. Implements consistent user targeting so the same user always sees the same variant. Shipped as a reusable Python package with a demo client that reflects flag changes within seconds.
- Pixelreaper Framework Dec 2024 – Present
 - Built an AI-augmented developer tooling platform integrating Claude code agents and playwright MCP and Engineered custom skills, multi- language code generation pipelines, and automated GitLab MR Review workflows to reduce manual engineering overhead.

Skills

Languages: Python, JavaScript
Frameworks: Django, DRF, ReactJS, FastAPI
Databases: PostgreSQL, MySQL, Redis
DevOps & Infra: Docker, Kubernetes, GitLab CI/CD, Nginx, AWS (EC2, S3)
Testing: Pytest, Playwright
Tools: Git, REST APIs, HTML, CSS, Agile, System Design
AI & GenAI: LLM, RAG, Langchain, Prompt Engineering, Ollama, Tool Calling, MCP, AI Agent

Education

Master of Computer Science Savitribai Phule Pune University Campus [PUCSD]	Aug 2020 - June 2022 Pune
